Good deal. I selected a lab (ALS) based on their detection capabilities and lower required bulk dust sampling size. Cassettes for dust sampling should arrive to hotel on Wed by 10 am.

Just fyi--things on my list:

-HASP

-make templates (I'm thinking 200 or 300 cm²), maybe I'll make a few and see how big they look

-finish field sheets: wipe/dust, 3030 log, surface baseline survey log, soil sampling

-grab Gillian pump (on Monday)

-get tubing for pump

...I'm sure there's more. I'm gonna head home early today (family party this evening) and then I'll be working tomorrow morning if you need anything. I'll try not to bug you. Enjoy your Christmas weekend.

Thanks,

I have signed it and scanned the signature page. Everything is with the QA folks now. I think they will be finished with their review today.
